Important Notice

The order of the Standard Catalogue of U. S. Coins and the Standard Paper Money Catalogue has been followed in this catalogue. So that collectors may have a quick guide to value we have placed after each lot the 1946 catalogue valuation. This valuation is by no means a limit or reserve. Where a definite valuation has not been given in the catalogue for condition quoted it has been averaged. A plus sign indicates a particularly fine specimen worth more than catalogue value.

Conditions of Sale

1. All bids to be Per Lot as numbered in the catalogue.
2. All bids to be by mail. The highest bidder to be the buyer. All bidders must have an established credit with the Cataloguers or send a deposit equal to 25% of their bids.

COINS OF THE WORLD

Twentieth Century Issues

Second Edition

A compilation of numismatic knowledge gathered over a long period of years, the original publication of which (in 1938) gave collectors their first authoritative reference work on modern coins. Outstanding authorities, collectors and dealers have contributed their knowledge to the production of this book, making it as complete and correct as possible.

Approximately 4,000 coins are listed and described, with the values given. Nearly 1,500 half tone illustrations show the types of all issues. "Coins of the World" is the standard reference book on modern world coinage.
